Hiring Team

Delivery Hero

## Re: Staff Data Scientist, Dmarts - Quick Commerce

Dear Hiring Team,

I am applying for the Staff Data Scientist role in Dmarts, Quick Commerce. Forecasting is the part of my data science work I return to most, and I have taken forecasting models from first analysis into production in telecom networks. The thread through it all is building models that operations teams can plan around.

In quick commerce a forecast turns directly into what sits on a shelf at Delivery Hero, and a wrong one means waste or an empty slot, so the work matters in a very concrete way. My fiancée lives in Berlin, and I am building my career in the city where we are making our home.

At Viavi I developed time-series forecasting of base-station call handover and SMS handover volumes with LSTM and XGBoost, and built a forecasting feature in our AIOps monitoring product that forecasts univariate KPIs across the network. I also ran Holt-Winters demand forecasting across 500+ network devices.

Outside work I am building ThinkTree.AI, a non-profit AI learning platform used by NGO teachers to support students with ADHD. It taught me to build for the people who depend on the output, and to change things carefully. I would welcome a conversation about the team's forecasting work.

Sincerely,

Abhinav Kaushik
