Hiring Team

Fin

Re: Senior Machine Learning Scientist

Dear Hiring Team,

I am applying for the Senior Machine Learning Scientist role on Fin's Machine Learning team. I am an applied scientist who has worked across supervised models, unsupervised clustering and transformer-based NLP, and my recent work is on LLM agents and how to evaluate them. What ties it together is finding the right ML framing for a product problem and proving it offline.

Fin answers customer questions end to end, and every model you ship is measured by whether a real customer got help. That is the feedback loop I want to work inside. My fiancée lives in Berlin, and we plan to move to Dublin together and settle there long term.

At Viavi I built an event-correlation engine with Sentence-BERT and DBSCAN that improved alarm classification by 73.5%, a problem that started unclear and needed the right framing. At United Health Group I built evaluation pipelines with LLM evaluators and tracing that cut human review by 43%.

Outside work I am building ThinkTree.AI, a non-profit AI learning platform used by NGO teachers to support students with ADHD. It has taught me to test ideas with real users early and to be careful about what ships. I would welcome a conversation about the team's work.

Sincerely,

Abhinav Kaushik
