Hiring Team

Fin

Re: Staff Machine Learning Scientist

Dear Hiring Team,

I am applying for the Staff Machine Learning Scientist role on Fin's Machine Learning team. I am an applied scientist with 8+ years across supervised models, clustering and transformer-based NLP, and lately I have shaped how LLM systems get built and evaluated. The thread through my work is turning ambiguous product questions into models that ship.

Fin is an AI agent judged on one thing, whether the customer's issue is actually resolved, and that clarity is rare and useful for an ML team. I want to help raise the bar on how those models are framed and tested. My fiancée lives in Berlin, and we plan to move to Dublin together and settle there long term.

At United Health Group I built the evaluation and tracing pipelines for our QA and summary agents, cutting human review by 43% and giving the team a shared way to judge quality. At Viavi I prototyped 15+ AI applications for clients, and 7 reached production or paid work.

Outside work I am building ThinkTree.AI, a non-profit AI learning platform used by NGO teachers to support students with ADHD. Building for teachers and children has made me careful about what ships and why. I would be glad to talk about how I could help your team.

Sincerely,

Abhinav Kaushik
