Hiring Team

KPMG Denmark

Re: Forward Deployed Engineers

Dear Hiring Team,

I am applying for the Forward Deployed Engineer role at KPMG NewTech. Much of my career has been spent where consulting meets code: running POCs with clients, then building the AI solution myself and taking it into production. Today that means agents built on Claude and LangGraph, running in real healthcare workflows.

Embedding with a client and building, instead of handing over a slide deck, is the work I enjoy most, and your alliance with Anthropic puts Claude at the centre of it. Turning field builds into reusable assets is how I already try to work. My fiancée lives in Berlin, and we plan to move to Copenhagen together and settle there long term.

At Viavi I delivered POCs and consulting for 15+ clients and prototyped 15+ AI applications, 7 of which moved into production or paid work. At United Health Group I built a Claude and Amazon Textract extraction agent that handles about 1,800 lab documents. I would bring that same path from first conversation to production to your clients.

Outside work, I am building ThinkTree.AI, a non-profit AI learning platform used by NGO teachers to support students with ADHD. Building it with teachers has taught me to scope with the people who will use the tool, not around them. I would welcome a conversation about the role.

Sincerely,

Abhinav Kaushik
