Hiring Team

Redcare Pharmacy

Re: Senior ML Engineer, Retail Media

Dear Hiring Team,

I am applying for the Senior ML Engineer role on the Retail Media team. I have spent 8+ years building ML systems that run in production, including ranking and propensity models that decide what a customer sees. The thread through my work is taking an unclear product question and making it a reliable system.

A retail media product built from the ground up inside a large online pharmacy is a rare chance to shape the models and the standards at once. Relevant ads for health products need extra care, which I like. My fiancée lives in Berlin, and we plan to build our life in Germany together and settle there long term.

At Optum I added a reranker to a plan recommendation system that increased conversion by 2%, and at Viavi I deployed a LightGBM SLA breach model with FastAPI and MLflow that cut downtime by 67%. Retail media is new to me, but ranking, targeting and honest offline evaluation are not.

Outside work I am building ThinkTree.AI, a non-profit AI learning platform used by NGO teachers to support students with ADHD. It reminds me that a model is only useful when it serves the person on the other side. I would welcome a conversation about the role.

Sincerely,

Abhinav Kaushik
