Hiring Team

Sycomp

Re: AI Solutions Architect

Dear Hiring Team,

I am applying for the AI Solutions Architect role at Sycomp. My recent work has been turning messy inputs into production AI systems, most of all a lab-extraction agent that reads long, unstructured documents and a LangGraph multi-agent chatbot. What ties it together is caring about what happens when the model gets it wrong.

Sycomp takes on complex IT projects for global customers, and a role that turns fuzzy business problems into working AI pipelines is exactly the work I enjoy. My fiancée lives in Berlin, and we plan to move to Ireland together and settle there long term.

I would bring a practical, evaluation-first way of building. My lab-extraction agent with Claude and Amazon Textract handles about 1,800 lab documents, and the evaluation pipelines I built with LLM evaluators and tracing reduced human review by 43%. Both started as ambiguous problems and became systems people rely on.

Outside work I am building ThinkTree.AI, a non-profit AI learning platform used by NGO teachers to support students with ADHD. It keeps me thinking about failure modes early, because the users cannot afford a tool that breaks. I would be glad to talk about how I could help your customers.

Sincerely,

Abhinav Kaushik
