Hiring Team

TÜV SÜD

Re: Data Scientist

Dear Hiring Team,

I am applying for the Data Scientist role in your digital team. Over the past years I have moved from classical data science to building LLM solutions end to end, most recently conversational agents and document extraction in healthcare. The common thread is taking a real business process and making it work reliably with data.

TÜV SÜD's work on safety across medical technology, elevators and automotive is the kind of setting where careful evaluation matters more than flashy demos. My fiancée lives in Berlin, and we plan to move to Munich together and settle there long term, so a role in Germany suits us both. I am also learning German.

I would bring hands-on experience with the full LLM lifecycle. I deployed a document-extraction agent using Claude and Amazon Textract that handles about 1,800 lab documents, and built evaluation and tracing pipelines that cut human review by 43%. I work comfortably with non-technical stakeholders from first scoping to rollout.

Outside work I am building ThinkTree.AI, a non-profit AI learning platform used by NGO teachers to support students with ADHD. It shapes how I build: close to the people who use it, and carefully. I would be glad to talk about the role.

Sincerely,

Abhinav Kaushik
