Hiring Team

TÜV SÜD

Re: Data Scientist

Dear Hiring Team,

I am applying for the Data Scientist role in your digital unit in Munich. My recent work is building LLM solutions from start to finish, especially document parsing and retrieval pipelines in healthcare, on top of years of classical data science in telecom. What ties it together is turning unstructured data into something teams can rely on.

Testing and certification depend on reading large volumes of technical documents correctly, and I would like to help make that work faster and safer. There is a personal reason as well: my fiancée lives in Berlin, and we plan to move to Munich together and settle there long term. I am learning German alongside.

I would bring practical experience with unstructured data and evaluation. I deployed an extraction agent using Amazon Textract and Claude on about 1,800 lab documents, and built evaluation pipelines with LLM evaluators that reduced human review by 43%. I am used to leading such projects directly with business teams.

Beyond work I am building ThinkTree.AI, a non-profit AI learning platform used by NGO teachers to support students with ADHD. It keeps me focused on building carefully for the people who use the system. I would be happy to discuss how I could support your team.

Sincerely,

Abhinav Kaushik
