Hiring Team

Vinted

Re: Senior Data Scientist, Buyer

Dear Hiring Team,

I am applying for the Senior Data Scientist role in the Buyer domain. The part of my experience closest to your needs is retrieval and ranking: a reranker for recommendations, dense retrieval with a fine-tuned cross-encoder, and gradient boosting models tied to conversion. Across all of it, I have tried to connect a model change to a business number.

Vinted's catalog is unusual: almost every listing is one of a kind, so search and recommendations cannot lean on repeat inventory the way normal e-commerce does. I find that problem genuinely interesting, and I like that better matching keeps clothes in use. My fiancée lives in Berlin, and we plan to move to Amsterdam together and settle there long term.

I would bring ranking and evaluation work that has run in production. At Optum I added a reranker to an existing recommendation system and lifted conversion by 2%, and at United Health Group I fine-tuned a cross-encoder to re-rank dense retrieval. At Viavi I built a RAG assistant with semantic retrieval that reached a 90% match rate.

Outside work I am building ThinkTree.AI, a non-profit AI learning platform used by NGO teachers to support students with ADHD. It reminds me that a recommendation only matters if a real person finds it useful. I would be glad to talk about how I could help the Buyer teams.

Sincerely,

Abhinav Kaushik
