Hiring Team

Anthropic

Re: Applied AI Architect, Startups

Dear Hiring Team,

I am applying for the Applied AI Architect role on the Startups team. I am a builder first: I design and ship LLM applications in production, with context engineering and evaluation at the centre, and I have spent years turning client requirements into working prototypes. Helping teams build well on a model connects all of it.

I build on Claude every day, and Anthropic's focus on reliable, steerable AI is the reason I trust it with healthcare work. Helping startups get it right early, when architecture choices stick, feels like the most useful place for my experience. My fiancée lives in Berlin, and we plan to move to London together and settle there long term.

I would bring production credibility that holds up in a technical deep dive. At United Health Group I deployed a lab-extraction agent on Claude Opus 4.7 handling about 1,800 lab documents, and built evaluation pipelines with LLM evaluators that cut human review by 43%. At Viavi I prototyped 15+ AI applications from client requirements, with 7 reaching production or paid work.

Outside work I am building ThinkTree.AI, a non-profit AI learning platform used by NGO teachers to support students with ADHD. Building for teachers taught me to start from what users actually need, which is how I would work with founders. I would be glad to talk about the role.

Sincerely,

Abhinav Kaushik
