Hiring Team

Sii Poland

Re: Senior Data Scientist – AdTech & Healthcare (f/m/x)

Dear Hiring Team,

I'm applying for the Senior Data Scientist – AdTech & Healthcare (f/m/x) role because it connects closely with the healthcare and applied AI work in my background. I'm a Senior AI Engineer with 8+ years of experience across healthcare, telecom and AIOps, building production systems around medical data, recommendations, document processing and analytics.

What interests me about Sii Poland is the opportunity to work on applied data and AI problems with a direct connection to healthcare or human outcomes. My fiancée lives in Berlin, and we plan to move to Warsaw together and settle there long term.

At UnitedHealth Group, I built a lab-extraction agent using Claude Opus 4.7, Amazon Textract and LIMS, and a LangGraph analytics system for AARP medical plans. Earlier at Optum, I built a recommendation reranker that increased conversion by 2%, while my Nippon Data Systems work included SQL and PySpark medical-audit pipelines.

Alongside my professional work, I am building ThinkTree.AI, a non-profit AI learning platform used by NGO teachers to support students with ADHD. Building it for real users keeps me focused on clarity, reliability and the experience around the technology, not just the model. I would welcome the opportunity to discuss how my background could contribute to the team.

Thank you,
Abhinav Kaushik
